Profile

Creative and passionate Frontend Developer, Dedicated to learning and growing in industry. I'm eager to work with you and learn more about programming.

Projects

Cryptosito, *Stack: Typescript, React, Nextjs*  10/2022 – present

- Built a web app displaying crypto market data with dynamic pages for detailed information and watchlist functionality.
- Created backend for adding coins to watchlist, buying shares, and posting in community section
- Added sorting, pagination, and registration features to the application for improved user experience.

Cool-Anime, *Stack: Typescript, React, Nextjs*  12/2022 – present

- Built a fullstack web app that displays random anime or anime characters from an API and allows users to vote on which one is cooler.
- Implemented API integration and a user-friendly interface for anime or character selection and voting, including a results page displaying ranking.

Flick-Folly, *Stack: Typescript, React, Nextjs*  02/2023 – present

- Built a web app powered by OpenAI that gives to a user recommendations of TV shows or movies based on user's input
- Added favorites functionality that let's you save list of recommendations in local storage

Portfolio, *Stack: Astro*  02/2023

- Rebuilt personal website using Astro framework, resulting in improved developer experience and faster, lighter portfolio website.
- Utilized Astro to create user-friendly static site with typesafe content

Open-Source Contributions

- Fixed typographical errors in the documentation of the RSSmarkable project, improving the clarity and accuracy of the instructions for users.
- Contributed to the open-source community by helping with translation of web documentation for an Interactive CLI tool create-t3-app
